

FRANKENSTEIN'S MATZAH

VEE'S SCIENTIFIC METHOD

1. QUESTION

Can Vee make a matzah come to life?

2. HYPOTHESIS

If Vee can figure out the right mixture then they will bring a matzah to life.

3. TEST AND EXPERIMENT

Vee tries different mixtures on the matzah and records the procedure, data, and results from each experiment.

4. ANALYZE RESULTS

Vee observes if the matzah has come to life. If the experiment fails, they conclude a variable needs to be changed and then they try again.

5. CONCLUSION/SHARE RESULTS

When Vee's experiment is finally successful, they share their results at the science fair.
